27-28 July 2016 Conference Aston, Birmingham, UK

The 11th Annual UK Light Rail Conference and exhibition brings together over 250 decision-makers for two days of open debate covering all aspects of light rail operations and development. Delegates can explore the latest industry innovation within the event's exhibition area and examine LRT's role in alleviating congestion in our towns and cities and its potential for driving economic growth.

Voices from the industry...

"Thank you for a brilliant conference. The dinner was really enjoyable and I just wanted to thank you and your team for all your hard work in making the event a success. I really appreciated the extra attention to detail on our behalf."
Marsid Greenidge - Head of Communications, Keolis UK

"We are really pleased to have welcomed the conference to the city and to help to grow it over the last two years. It's been a pleasure to partner with you and the team, and thank you for always being respectful to our suggestions."
Sarah Alton - Communications & Marketing Business Partner, Nottingham City Council

"On behalf of UK Tram specifically and the industry as a whole I send sincere thanks for such a great event. Everything about it oozed quality. I think that such an event shows any doubters that light rail in the UK is here to stay and can present itself in a way that is second to none."
Colin Robey - Managing Director, UKTram
